

Bulletin 100 Line Cut-away Starter Sample (18 Ampere Device Shown)

Product Data

Are IEC motor starters a "Commodity"? No! Compare the design features that distinguish Allen-Bradley IEC Motor Starters from the competition.

Allen-Bradley's Bulletin 100 is the **only** IEC starter UL Certified to provide Type 2 Short Circuit Coordination with 100kA available (9A through 30A sizes). Contact your nearest Sales Office for details.

* Unique terminal shroud design meets IEC finger safe requirements yet provides retained visibility for faster wiring and sure connections.

Silver alloy double break contacts. Low contact bounce for extended electrical life.

Accessories such as auxiliary adder decks, timers and latches are easily installed without tools.

Arc quenchers direct arc away from contacts providing superior performance under severe loads (18 Ampere size and larger).

* Removable cover for ease of contact inspection, replaceable contacts above 30 Ampere size.

* Backed out terminal screws at all locations for faster, easier wiring.

Manual or automatic reset option for flexibility.

* Welded on contact tips (not riveted) for reliable performance.

Shading coil and precision ground magnet faces for quiet operation.

35mm DIN rail or panel mounting.

* Anti-Slide Pads prevent movement of starter on DIN rail due to vibration.

Coils are easily replaced with a wide variety of global voltages in 50/60 Hz.

Magnet assembly incorporates shock absorption features for long life and quiet operation.

Directly heated bimetals with integral heater elements resulting in compact size and low excess heat generation per phase.

Class 10 tripping characteristics, ambient temperature compensated and single phase sensitive.

* Denotes features not found in several competitive devices.

A subsidiary of Rockwell International, one of the world's largest technology companies, Allen-Bradley meets today's automation challenges with over 85 years of practical plant floor experience. More than 11,000 employees throughout the world design, manufacture and apply a wide range of control and automation products and supporting services to help our customers continuously improve quality, productivity and time to market. These products and services not only control individual machines, but also integrate the manufacturing process while providing access to vital plant floor data that can be used to support decision-making throughout the enterprise.
