**WARNING:** To avoid hazards of electrical shock, remove all power before proceeding. Auxiliary contacts commonly control separate sources of power. Be sure they and all sources of power are disconnected.

**OPERATING ENVIRONMENT** - Contactors should always be maintained in a clean and dry condition for dependable operation. Choice of the proper NEMA enclosure type for the application is very important.

**PREVENTIVE MAINTENANCE** - For recommended preventive maintenance instructions refer to Publication GI-5.0 or the Industrial Control Catalog.

**ORDERING INFORMATION** - Your order cannot be entered unless the part number and description of part is given. This renewal parts list also applies to these contactors when used on control apparatus under other Bulletin Numbers.
