

1336 Custom Option Label

Description

A custom drive catalog option label has been included in this spare parts kit to ensure that an upgraded drive can be correctly identified as being custom. The label must be installed if:

- A custom option is installed on a standard drive that previously did not have this option. This is indicated by the absence of an “-MXxx” or “-ENxxx” option specifier in the catalog string listed on the drive data nameplate matching the custom control board.

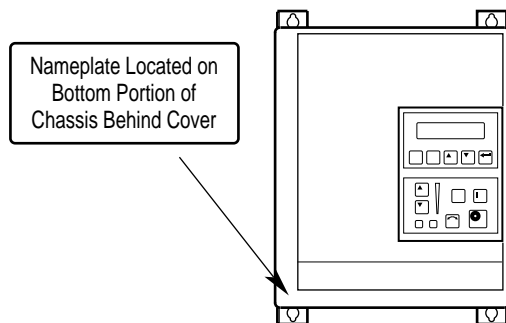

The label can be discarded if this spare parts kit is an identical replacement for a custom drive option already listed on the data nameplate catalog string.

Installation

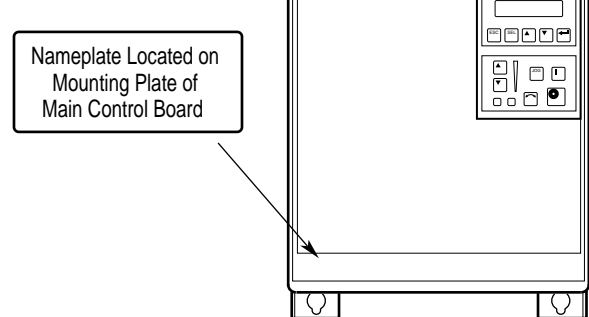

Nameplate Locations

The custom drive catalog option label should be installed near the existing drive data nameplate.

¹ Refer to drive user manual for frame reference classifications.

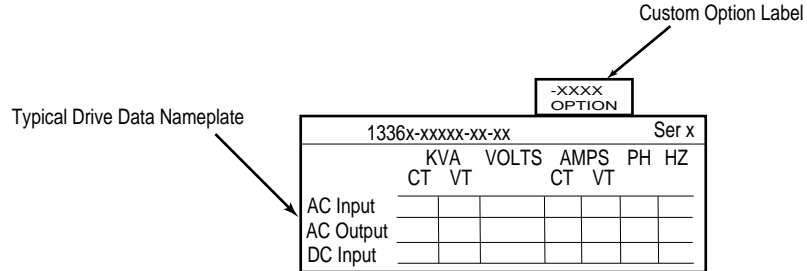

Frames¹ A1, A2, A3, A4

Frames¹ B - G

Custom Option Label Placement

Placement of the label after removal of the backing should be near the upper-right corner of the drive data nameplate without touching or covering any nameplate information.
