

ControlLogix Analog Servo Modules Revision 15

Catalog Number 1756-HYD02, 1756-M02AE, 1756-M02AS

When to Use These Release Notes

Use these release notes for this revision:

Module	Catalog number	Revision
ControlLogix 2-axis hydraulic servo module	1756-HYD02	15.1
ControlLogix 2-axis analog encoder servo module	1756-M02AE	15.1
ControlLogix 2-axis analog SSI servo module	1756-M02AS	15.1

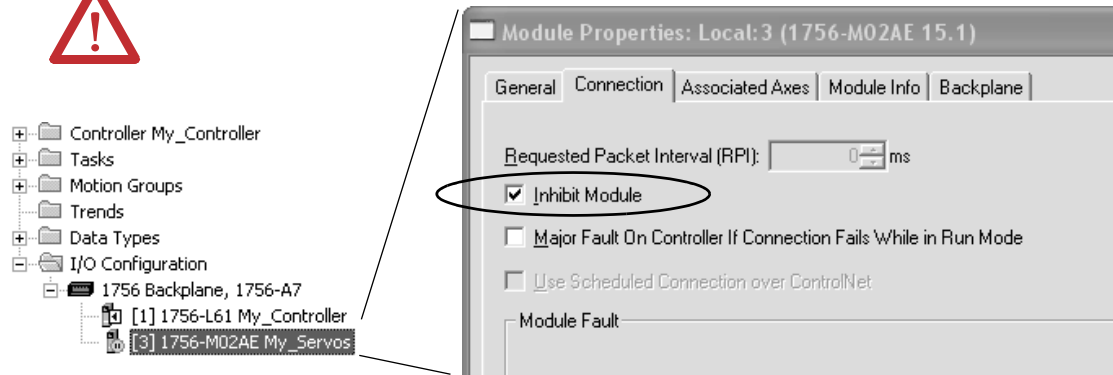

Compatible Revisions

To use this revision, update your system as follows:

Update this	To this revision
RSLinx® software	2.50 or later
RSLogix™ 5000 software	15
ControlLogix® controller	15

Before You Update Your Module

ATTENTION Before you update your module, inhibit the module.

The screenshot shows the RSLogix 5000 software interface. On the left, the I/O Configuration tree is expanded to show a '1756-M02AE My_Servos' module. On the right, the 'Module Properties' dialog box is open for 'Local:3 (1756-M02AE 15.1)'. The 'General' tab is selected, and the 'Inhibit Module' checkbox is checked and circled in red. Other options like 'Major Fault On Controller If Connection Fails While in Run Mode' and 'Use Scheduled Connection over ControlNet' are unchecked.

This disables the axes and makes it easier to update the module.

Enhancements

For a list of enhancements, see *ControlLogix Controllers Revision 15 Release Notes*, publication 1756-RN620.
