

AC (12-120V) Output Module (Catalog Number 1771-OAD Series C)

This release note contains information on:

- a new fuse installed in series C modules

Use this release note with publication 1771-5.24, ac (12–120V) Output Module Installation Instructions.

Change in Fuse Requirements

The fuse requirements for the 1771–OAD series C module have changed. The module now ships with a 12A, 250V rectifier fuse.

If a replacement fuse is required, specify Bussman GBB12.

ATTENTION: Do not attempt to use a 12A, 250V rectifier fuse in 1771-OAD series A or B modules. Series A and B modules require a 10A, 250V rectifier fuse.

Allen-Bradley, a Rockwell Automation Business, has been helping its customers improve productivity and quality for more than 90 years. We design, manufacture and support a broad range of automation products worldwide. They include logic processors, power and motion control devices, operator interfaces, sensors and a variety of software. Rockwell is one of the world's leading technology companies.
