

## Synchronization Cable

(Catalog Number 1784-PMCSY4)

Up to four (4) 1784-PM02AE cards may be installed in a single computer provided there are enough PCI Bus slots available. A sync cable is required to keep the cards synchronized. This is a ribbon cable with four connectors that fit to the cards.

The cable is a 28AWG, 7/36 stranded, ribbon cable with centerline spacing of .05mm. The connectors are 10 way ribbon cable receptacles of gold over nickel.

Figure 1 1784-PMCSY4 Cable

The 10 pin connector attaches to the card at the opposite edge from the PCI Bus connection.

---

**IMPORTANT**

The connectors should be fitted the same on all cards, as the mating connector is not polarized.
