

Custom Motor-Rated Cam Switches

Bulletin 194L

Bulletin 194L Motor Rated Cam Switches are now available in many customer-specified configurations. These switches are designed for your application's most demanding motor control needs.

The 194L switches are offered in 12, 16, 20 or 25A load sizes. Switches may be configured for up to 16 inductive load-rated circuits. Handle operation may be specified for up to 12 positions, with 30, 60, 45 or 90 degrees of positional rotation. Maintained and some spring return functions may be specified. Custom legend markings are also available.

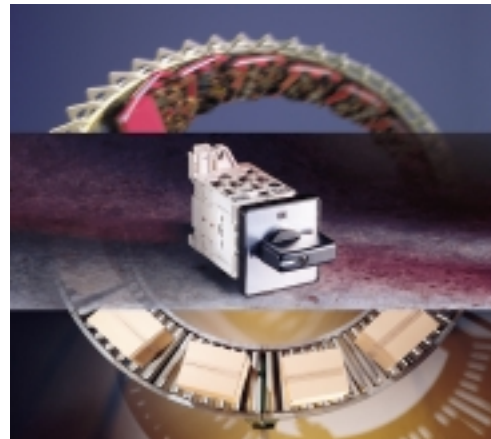

Bulletin 194L devices are UL 508 listed, CSA 22.2 #14 certified, CE marked. They can be used as Manual Motor Controllers plus are suitable as Motor Disconnects.

Key Features

- Motor rated/HP rated to switch inductive loads
- Same appearance as standard 194L devices
- Suitable as Motor Disconnect
- Suitable for Across-the-Line motor starting applications
- Gold flashed contacts for Auxiliary load switching
- UL listed, CSA certified, CE compliant
- Lockout/Tagout compliant (when using lockable handles)
- Mounts to many competitive panel drilling patterns

Typical Applications

- Food processing
- Semiconductor manufacturing
- Material handling
- Automotive assembly
- Tire production
- General electrical machinery

Instructions to receive your price and availability quotation

Simply fill in the layout form on the reverse side.

Fill in distributor name, date, telephone/fax, quantity required and end user name.

Select all the following options:

- Switch load size and mounting style
- Target table, # positions, spring returned/maintained operation
- Handle type
- Special wiring & terminal markings (optional)
