About This Publication

This publication provides information regarding the conversion of the VersaView CE devices to the PanelView Plus product line. To simplify application, order handling, support and stocking for customers and all sales and support organizations, the VersaView CE product line is now an extension to the PanelView Plus product family.

- All VersaView CE devices are now named PanelView Plus CE.
- All 6182H configured catalog numbers for VersaView CE devices are replaced by new 2711P configured catalog numbers for PanelView Plus CE devices.
- All new 2711P display modules can be used with either the PanelView Plus or PanelView Plus CE logic modules.

Catalog numbers for VersaView CE display modules will be obsoleted.

Note that the high-bright display module only operates on a logic module with a dc input.

- All 6189-RP x catalog numbers for VersaView CE logic modules are replaced by new 2711P-RP x catalog numbers for PanelView Plus CE logic modules.
- All 6189-RW x catalog numbers for VersaView CE internal CompactFlash are replaced by new 2711P-RW x catalog numbers for PanelView Plus CE internal CompactFlash.
- Series F and later PanelView Plus terminals can be converted to PanelView Plus CE terminals by changing the internal CompactFlash to cat. no. 2711P-RW6, -RW7, or -RW8.
- All products are consolidated into discount schedule OI.

Repair Strategy

All VersaView CE units returned for repair will be converted to the equivalent catalog number of a new PanelView Plus CE unit with the latest revision.

As of May 2006, new orders that requested units with ac input power were filled by shipping a unit with an internal, integrated ac power supply. The catalog number conversion tables describe this change. For example, 6182H VersaView CE terminals with an external ac-to-dc power supply have a catalog number ending in *B*, 6182H-7BEH4*B*. When these units are returned for repair or exchange, a terminal with an dc power input will be returned, assuming the external ac-to-dc power supply was **not** returned. The catalog conversion tables starting on page 5, identify these catalog numbers by a footnote.

Catalog Number Explanation

The table shows the new catalog number explanation for PanelView Plus 700 to 1500 and PanelView Plus CE terminals.
